PROJECT GUIDE

# CORONEL WEBSITE & APP

What's on the website, the idea behind the project and how to use the app for clients and the admin.

1 The idea
2 The website
3 The app for clients
4 The app for the admin
5 Card and booking rules
6 Still to be completed

**Addresses**

| | |
|---|---|
| Website (Italian) | coronel-studio.netlify.app |
| Website (English) | coronel-studio.netlify.app/en/ |
| Same website, second address | astounding-dragon-05aa84.netlify.app |
| Coronel app | coronel-app.netlify.app |

November 2026

# 1 · THE IDEA

**Coronel is a brand, not a barber shop.** The name is at the centre of everything: no page talks about a barber. It talks about haircuts, style and care, with Chilean roots as the signature (the red, blue and white of the flag, the “calor chileno”, the line “A starter's cut, national-team treatment”).

There were four goals:

### Be found

A clear, fast website in Italian and English, with price list, live opening hours and address.

### Be booked

Booking in the app: the client picks a service, day and free time; Coronel confirms.

### Bring clients back

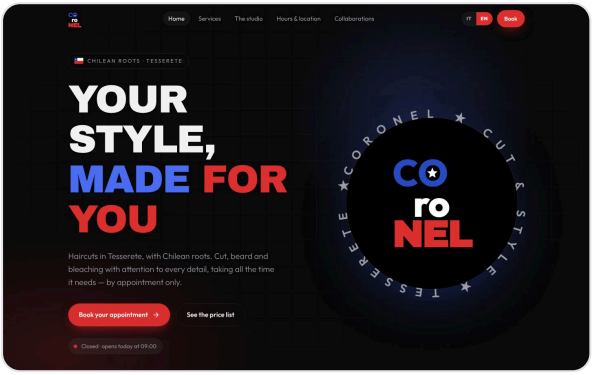

A stamp card with rewards and levels, like the Essenza app: regulars get rewarded.

### Earn beyond haircuts

A Collaborations page for brands that want to display or sell products, make merchandise or host events in the studio.

# 2 · THE WEBSITE

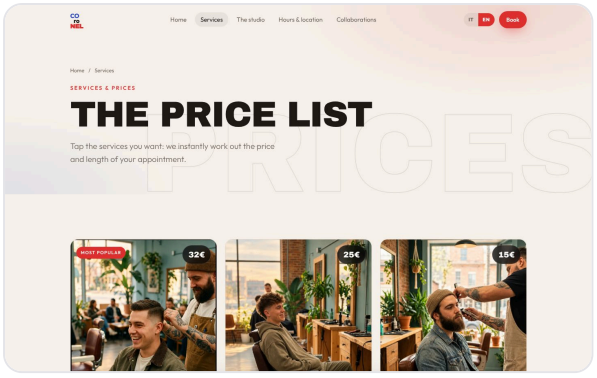

The website has five separate pages: the menu takes you from one to another (it isn't a single scrolling page). Each page has its own look, linked to its topic. At the top right there is the **IT / EN** switch, which opens the same page in the other language.

### Home

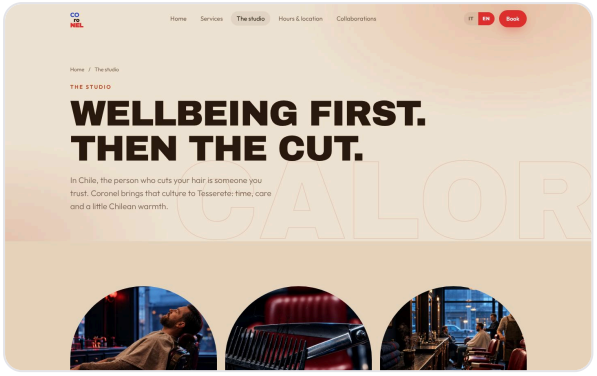

Dark brand cover: spinning round logo, animated title, live “open/closed” status, Book button and cards leading to the other pages.

# 2 · THE WEBSITE

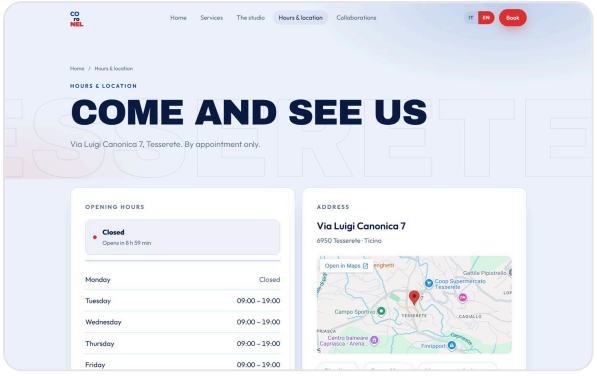

## Services

Light cream page. Price list with photos, prices and length: tapping services instantly adds up total and time. On phones, the cards slide to the right as you scroll down.

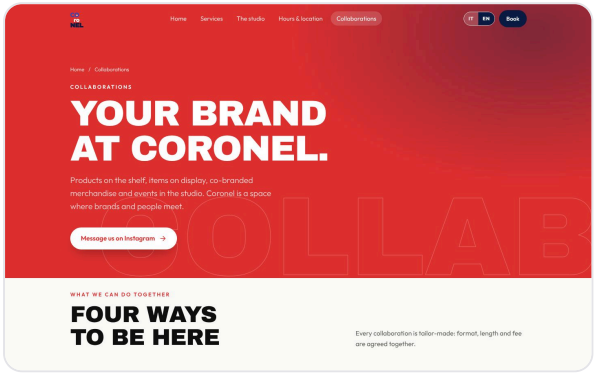

## The studio

Sand and terracotta tones: the “Wellbeing first, then the cut” philosophy, three arched photos and the Chilean flag band.

## Hours & location

Light blue and Chilean blue: opening hours with countdown (Tue–Fri 9–19, Sat 9–18, Sun–Mon closed), address, map, directions, copy address, Instagram DM.

## Collaborations

Poster-style red header. Four formats for brands: product shelf for sale, paid display, co-signed merchandise, events in the studio. A form prepares the message and opens the Instagram chat.

# 3 · THE APP FOR CLIENTS

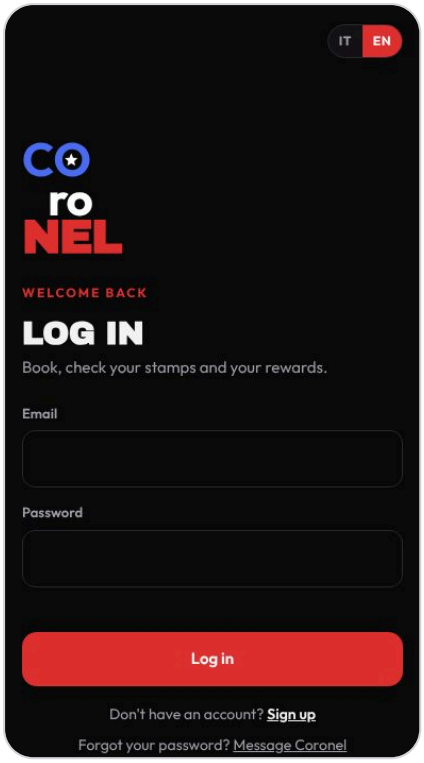

## Installing the app on your phone

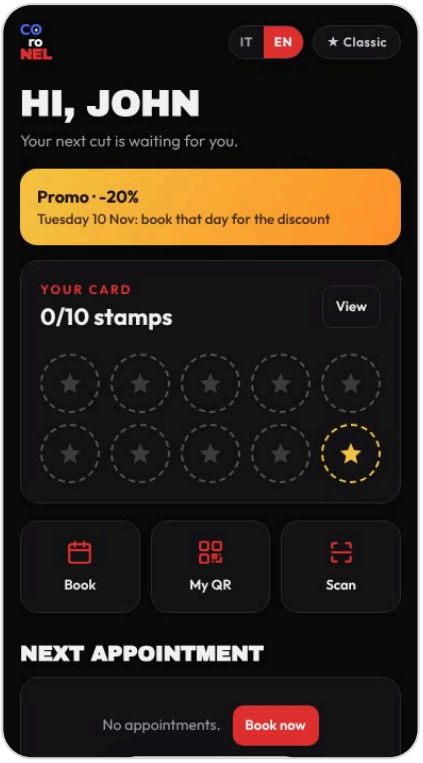

**iPhone (Safari)**

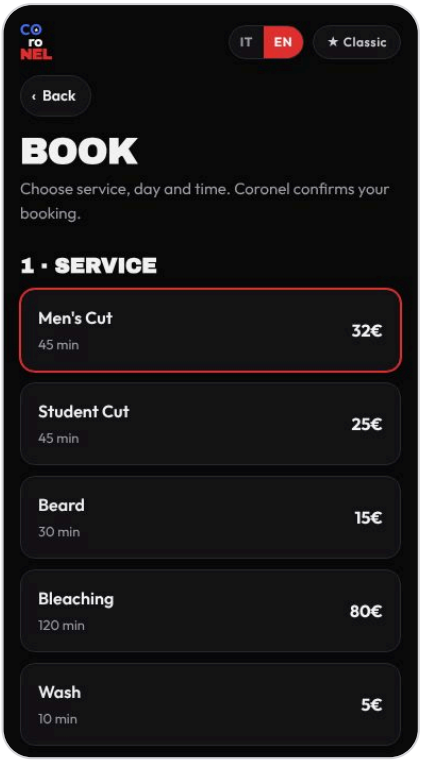

Open https://coronel-app.netlify.app, tap Share (square with arrow), then “Add to Home Screen”.

**Android (Chrome)**

Open https://coronel-app.netlify.app, tap the three dots ⋮, then “Install app” or “Add to Home screen”.

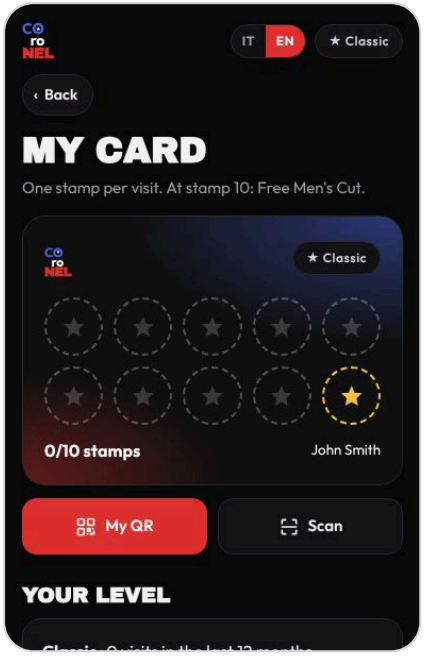

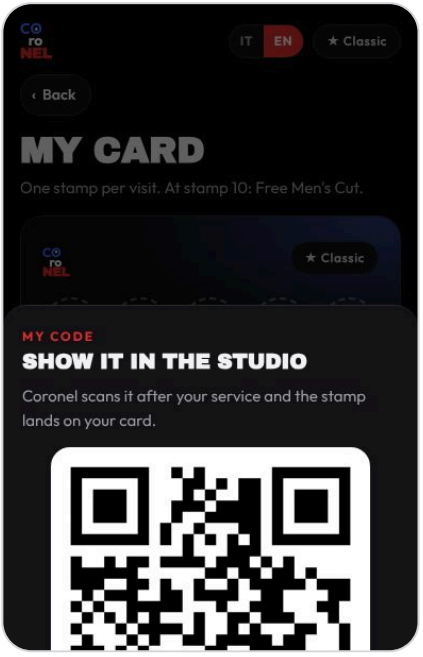

# 3 · THE APP FOR CLIENTS

| | |
|---|---|
| **Sign up** | Name, email, phone (optional) and a password of at least 8 characters. Log in with email and password. |
| **Home** | Greeting, card, banner for the next discount day, next appointment and services with prices. |
| **Booking** | Book tab: 1) service, 2) day (up to 4 weeks ahead, discount days show a “-20%” tag), 3) one of the free times, then “Send booking”. The status changes from “requested” to “confirmed” when Coronel confirms. It can be cancelled. |
| **Card** | One stamp per visit. At the 10th stamp: free Men's Cut. Here you find your own QR, the scanner for the shop QR, your level and history. |
| **Profile** | Details, change password, language, gift voucher request, contacts, log out and delete account. |
| **Going back** | Every screen (except Home) has a “‹ Back” button; the phone's back button works too and also closes open windows. |

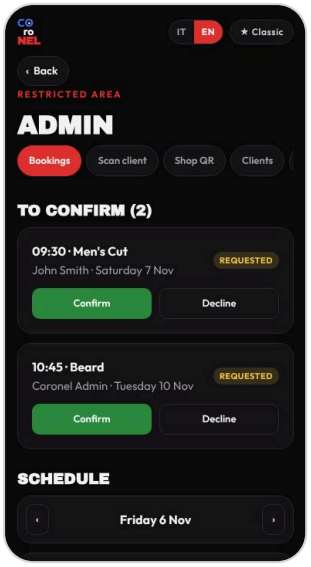

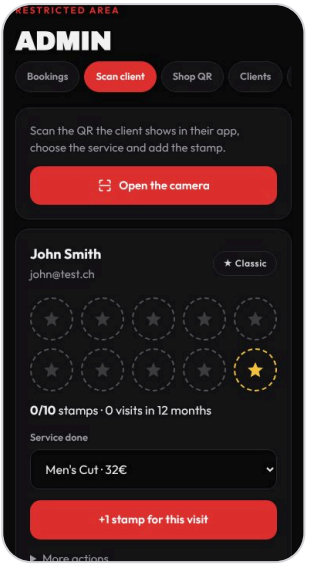

# 4 · THE APP FOR THE ADMIN

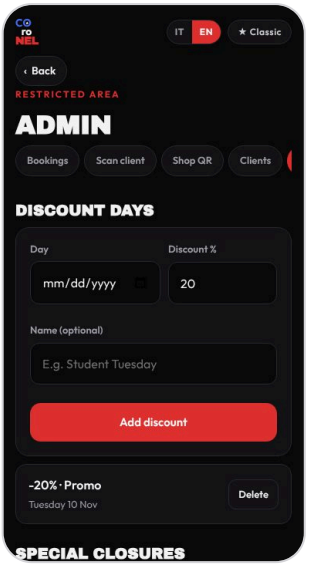

> The admin account is **stefanvuckovic262007@gmail.com**. After logging in, the **Admin** tab appears at the bottom, visible to the admin only. **Tip:** change the password right away from the Profile, because it was written in the chat.

| | |
|---|---|
| **Bookings** | Bookings to confirm at the top; below, the day-by-day schedule. Buttons: Confirm, Decline, and for confirmed ones “Done · +stamp” (the stamp is added automatically) or Cancel. |
| **Scan client** | Opens the camera: point it at the QR the client shows in their app, choose the service done and add the stamp. The reward is redeemed here too. |
| **Shop QR** | Creates a QR valid once for 5 minutes: the client scans it with their app and gets the stamp. You can see who used it. |
| **Clients** | Search by name, email or phone; client sheet with stamps and bookings, ±1 corrections and “Set new password” for anyone who forgot it. |
| **Discounts & closures** | Adds discount days (percentage and name) and special closure days (holidays): clients see them straight away. |
| **Vouchers** | When the client pays in the studio: “Paid · activate” creates the code (e.g. CRN-7F6512); once used: “Mark as used”. |

# 5 · CARD AND BOOKING RULES

| | |
|---|---|
| **Stamps** | 1 stamp per visit · 10 stamps = free Men's Cut (the admin redeems the reward). |
| **Levels (visits in the last 12 months)** | Classic 0+ · Silver 5+ · Gold 12+ (bonus stamp every 5 visits) · Black 24+ (bonus stamp every 3 visits). |
| **Bookings** | 15-minute slots within opening hours · up to 4 weeks ahead · maximum 3 open bookings per client · two clients can never take the same time. |
| **Shop QR** | Valid for 5 minutes, once. |
| **Data and privacy** | Data is stored in the Netlify storage of the coronel-app project (free). Passwords are encrypted. Every client can delete their account from the Profile. |

# 6 · STILL TO BE COMPLETED

- ★ Booking link: the website's “Book” buttons still lead to the old base44 link without the studio code. They can be linked to the Coronel app instead.
- ★ Opening hours: the website uses those from the old website (Tue–Fri 9–19, Sat 9–18); the Instagram bio says Tue–Fri 9–18, Sat 9–17. The right hours need to be chosen.
- ★ Prices: shown in €; if the shop charges in CHF, the symbol should be changed.
- ★ Photos: the current photos are computer-generated; real photos of the studio would make the website more credible.
- ★ Real reviews and collaborations: can be added as soon as they exist.
- ★ Domain: a custom domain (e.g. coronel.ch) can replace the netlify.app address.
- ★ Notifications: today new bookings are seen by opening the app; notifications can be added later.
